| **BGV Beryllium**

Perzhansky Beryllium deposit is unique and the largest in the world in terms of the quality and scale of Genthelvin mineralization.

Beryllium Ore Deposit Overview

The Perzhanskoe beryllium deposit is located in the Zhytomyr region. Ukraine. 20 km. from the deposit there is a railway station Olevsk, an asphalt road adjoins the deposit and a 10 kW power transmission line is connected. Exploration of the Perzhansk beryllium deposit was carried out in 1962 – 1977. To calculate the reserves, 236,500 m of wells were drilled, 7104 meters of underground mine workings were drilled on two horizons

PROVEN RESERVES:

Ore reserves

2 835.7
thousand tons

BeO

15.307.8
thousand tons

Cut-off grade
of BeO

0.54%

In terms of metal

5 512
tons of beryllium

In addition

39.800
tons of zinc will be extracted
along the way
