YURIEVSKOYE TITANIUM-APATITE ORE DEPOSIT

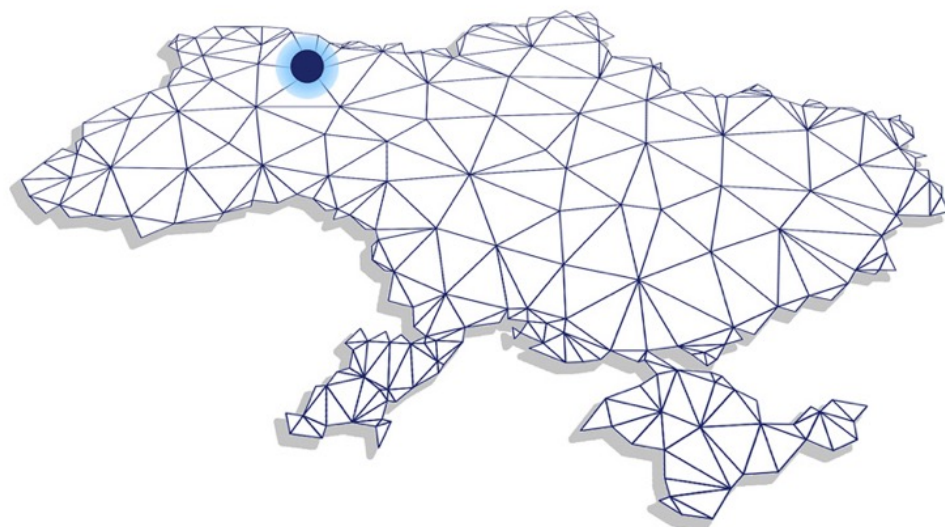

Zhytomyr Region, Ukraine

BGV TITANIUM

Yurievskoye deposit is located in the Zhytomyr region. Deposit area is connected with the district center by asphalted roads. The railway KyivBrest passes Olevska.

In geostructural terms, the Yurievskoye deposit of titanium-apatite ores is located within the central part of the Sushchano-Perzhanska tectonic zone and is confined to the rock intrusion of the same name, which was formed at the final stages of the Korosten complex.
